

MODEXIA INC. CORPORATE PROFILE (ISP DIVISION)

1. WHO WE ARE

Modexia Inc. is a next-generation Internet Service Provider (ISP) and Network Infrastructure company. We specialize in building "Last Mile" fiber connectivity in emerging markets and providing high-speed dedicated links for global enterprises.

- **Mission:** "Connecting the Unconnected." To treat internet access as a fundamental utility, not a luxury.
- **Core Network:** We own 15,000km of fiber optic cabling across East and West Africa, peering directly with global Tier-1 providers in London and Singapore.

2. KEY INFRASTRUCTURE

- **NOC (Network Operations Center):** Our 24/7 command center in Nairobi monitors traffic spikes and outages.
- **Data Centers:** Modexia operates Edge Data Centers in Lagos and Mumbai to cache content (Netflix/YouTube) locally for faster speeds.

3. BUSINESS UNITS

- **Fiber-to-the-Home (FTTH):** Serving 500,000 residential homes.
- **Enterprise Connectivity:** Providing MPLS and Dedicated Internet Access (DIA) to banks and government agencies.
- **Smart City Solutions:** Providing IoT connectivity for traffic lights and sensors.
